

MUHAMMAD AQIL ASHRAFF

Bachelor of Design (Digital Games) Student

PROFESSIONAL PROFILE

Highly motivated and tech-savvy individual with a strong background in digital design and game development. Equipped with hands-on experience in graphic design and system troubleshooting, alongside advanced academic projects in Unity and C#. Eager to leverage creativity and technical skills in a dynamic internship environment to contribute to impactful projects.

ACADEMIC & GAME PROJECTS

Local Co-op Zombie Survival Game (FYP) Ongoing

- Developing a 3D zombie survival game featuring environments inspired by the university campus.
- Engineered a flexible local co-op split-screen system and programmed core mechanics using Unity and C#.

The Zero Hour Game Concept & Prototyping

- Developed the core concept and mechanics for a serious game simulating the high-pressure experience of an emergency dispatcher.
- Designed operational goals and unique selling points focused on rapid decision-making and resource management.

The Last Teacher: A World Without Logic Concept Development

- Created a comprehensive narrative and structural concept for a dystopian educational game where the player navigates a world where logic and learning are suppressed.

EDUCATION

Universiti Pendidikan Sultan Idris (UPSI) Expected Nov 2027

Bachelor of Design (Digital Games) with Honours

SMK Pokok Sena 2021

Sijil Tinggi Pelajaran Malaysia (STPM) - High Credit
